WHAT'S NEW WITH KNOW?

Ever wonder how the Ancient Egyptians lived? This culture was more than just mummies. In this issue, we unwrap the truth!

KNOW IT ALLS

Why did artists in Ancient Egypt always show people from the side? And how did scientists learn to read hieroglyphics?

EXPERIMENTS

Learn to write in Ancient Egyptian hieroglyphics. Then, make a mummy in your own kitchen!

REVIEWS

KNOW readers review *The Jumbo Book of Space* and *Wonders of the Natural World*.

BLOG

Check out what your favourite "knowrns," Knowiton and Knowella, are up to by reading their on-line journal!

FUN FEATURES

Fill in our printable colouring pages, or download cool desktop background "wallpapers" for your computer!

#14 - Ancient Egypt

March/April 2007

Pack your bags. In this issue of *KNOW*, we're heading back 5000 years to explore the people and places of Ancient Egypt. You can read up on the daily life of Egyptian families and get some building tips from the people who built the great pyramid of King Khufu. (Tip #1: You'll need more than two million blocks of stone and about 20,000 workers.) This issue also includes a mummy-maker's checklist and a lesson on reading Egyptian writing. In other sections in *KNOW*, you'll learn why you have fingernails and how a piano works. There are jumping spiders, dinosaur detectives, and, of course, readers' crazy comic captions and snazzy art.
